GENERAL NOTES (ALL INSTALLATIONS)

- 1. Minimum 3" high door top rail is required to mount drop plate.
- 2. Position the drop plate on the door and the door closer's parallel arm bracket on the door frame's door stop soffit at the appropriate location for the desired door opening angle.
- 3. Door closer mounting screws must finish flush with the back of the drop plate's face so that the door surface is not damaged.
- 4. The drop plate must be securely mounted on to the door using supplied or applicable mounting hardware. Wood screws require a minimum solid wood thickness of 1-1/4". Machine screws require a minimum door skin thickness of 1/8" or reinforcing material. Otherwise use through bolts with sexnuts (not included).
- 5. Mount the door closer's parallel bracket securely on to the door frame's door stop soffit using 4 machine screws. For additional rigidity install the 5th screw using the provided spacer (if required).
- 6. Complete door closer installation by refering to the installation instructions supplied with the door closer.
